

RINGING AT GREENHAM COMMON 2011

Greenham Common: 2011 Ringing Report

2011 is the first full year of ringing at Greenham Common by Newbury Ringing Group and Greenham Common Nest Recording Group. The area operated is normally the common land in the parish of Greenham. Ringing by the group also takes place on Crookham Common usually by group member Pat Martin and is not covered by this document except for ground nesters at Crookham Pools. Ringing was carried out at the following places:

- **Ranger's Compound (616) Control Tower Car Park.** Here a feeding station is situated off the common in the fenced compound around the West Berkshire Rangers building known as 616. The feeder is referred to as the 616 feeder. It consists of a peanut feeder, a large black sunflower feeder, a fat-ball feeder and one to four Niger feeders depending on the intensity of use. Feeders are topped up every third day at least in winter less often at other times of the year. The basic mist net setup is one each of the following length nets: 18m, 12m, and 10m. These 2.7m high nets are erected in permanent rides near the feeders. Other nets are erected in the paddocks and around depending on the time of year, weather conditions and number of ringers attending a session. In the period October through to March the 616 feeder is ringed for four hours maximum at least once in each half of each month.
- **Fire Plane Gravel Scrub East (FPGE).** An area of birch and bramble scrub east of the fire plane near the Venture West building. Usually two nets are erected supplemented with additional nets depending on the number of ringers attending. This area is mostly utilised during spring and autumn migration but occasionally at other times.
- **Fire Plane Gravel West (FPGW).** An area of gorse scrub with some birch trees to the south west of the gravel. Usually three nets are erected more if other ringers are available.
- **Peaked Hill Nest Boxes (PHILL).** Thirty two nest boxes erected in the woodland to the south and west of the Fire Pane Gravel have been monitored since 2002 for the period April to July as part of the BTO Nest Box Scheme. All pulli found in the boxes are ringed each year.
- **Peckmore Copse & Sandford Copse.** 34 boxes are erected; these areas of woodland are in the South west corner of the common. Each copse is monitored by a team of three or four during the breeding season and the data compiled for the Nest Recording Scheme as above. Pulli ringing of these boxes is not normally undertaken.
- **Western Overshoot Compound (WOS).** This is the fenced off area at the western end of the common on what was the gravel overshoot of the runway. The compound is divided into two and 18m mist nets are erected in each compartment. This area is mainly ringed during the spring and autumn migration.
- **Ground Nesting Birds Project.** The group also assists providing ringing capabilities, nest monitoring and schedule one facility as appropriate for the BBOWT coordinated ground nesting bird project on both Greenham & Crookham Commons for the period March to August.
- **Other Areas.** Occasional ringing took place in other areas of the common on a casual basis.

List of Ringing Visit Dates with Places and Capture Totals for Each Visit

Place Codes:

| | | | |
|--------|-------------------------------------|-------|---|
| 616FDR | Feeder in the 616 building compound | 616W | or E Gravel areas each side of 616 building |
| FPGE | Scrub east of Fire Plane Gravel | FPG | Fire Plane Gravel |
| WOS | Western Overshoot Compound | FPGW | Scrub west of Fire Plane Gravel |
| SAN | Sandleford Copse Nest Boxes | PHILL | Peaked Balshill/Aldernbridge Nest boxes |
| LOZ | Heath "lozenges" in central areas | CPO | Crookham Pools |

Below are visit dates when ringing was carried out.

Place codes and total number of captures shown alongside each date.

| | | | | | |

| Whitethroat | 23 | 0 | 0 | 23 |
| Garden Warbler | 10 | 0 | 1 | 11 |
| Blackcap | 47 | 0 | 2 | 49 |
| Chiffchaff | 38 | 0 | 1 | 39 |
| Willow Warbler | 12 | 0 | 0 | 12 |
| Goldcrest | 36 | 0 | 2 | 38 |
| Firecrest | 1 | 0 | 0 | 1 |
| Long-tailed Tit | 31 | 0 | 16 | 47 |
| Marsh Tit | 4 | 0 | 2 | 6 |
| Coal Tit | 9 | 8 | 15 | 32 |
| Blue Tit | 218 | 112 | 148 | 478 |
| Great Tit | 124 | 75 | 96 | 295 |
| Nuthatch | 0 | 0 | 1 | 1 |
| Jay | 2 | 0 | 0 | 2 |
| Chaffinch | 25 | 0 | 3 | 28 |
| Brambling | 4 | 0 | 0 | 4 |
| Greenfinch | 24 | 0 | 0 | 24 |
| Goldfinch | 93 | 0 | 16 | 109 |
| Siskin | 58 | 0 | 8 | 66 |
| Linnet | 2 | 0 | 0 | 2 |
| Common Redpoll | 10 | 0 | 5 | 15 |
| Lesser Redpoll | 257 | 0 | 170 | 427 |
| Bullfinch | 10 | 0 | 0 | 10 |
| Reed Bunting | 1 | 0 | 0 | 1 |
| Total for: Greenham Common | 1162 | 233 | 544 | 1939 |

Of note are:

Ringed Plover

Two broods of 4 and 3 ringed as pullis at the Fire Plane Gravel.

Lapwing

21 pullis ringed in the year, the recoveries are those birds that survived to be colour ringed (about seven days old) just one seen to fledge. The other two last seen at 616W thought to have been taken by foxes.

| | |
|--------------------------|---|
| Collared Doves | Very wary and difficult to capture |
| Great Spotted Woodpecker | 24 captures of 14 individuals |
| Woodlark | An adult and two broods of 3 and 2 chicks. |
| Meadow pipit | Few about during the year total includes a brood of five |
| Dunnock and Robin | Good numbers mostly captured out on the heath/scrub |
| Nightingale | Just one capture hopefully will do better in the future. |
| Redstart | A scarce migrant on the common and the second year we have been lucky enough to trap one. |
| Stonechat | Three adults and no nests located this year; must try harder! |
| Thrush's | Unexpected numbers of Blackbird with a few of Song Thrush and a couple of Redwing the latter always nice to see in the hand. |
| Warblers | Good numbers of Blackcap, Garden Warbler, Whitethroat, Chiffchaff and Willow Warbler and a Scarce Lesser Whitethroat as a bonus. |
| Goldcrest | A species effort made in the autumn mostly at the western enclosure paid off; hope to repeat in 2012. |
| Firecrest | One in the net was a nice surprise when going for Goldcrest. |
| Tits | Good Numbers of Blue Tit and Great captured in winter at the 616 feeder including one or two ringed as pulli in nest boxes. Coal Tit are captured in small numbers and just one or two Marsh Tit visit feeders in winter. Long-tailed Tit also visit the peanut feeder and also out onto the heath and scrub in feeding flocks. |
| Chaffinch | Good numbers for the first winter period at the 616 feeder, many migrant birds from the north |
| Brambling | Four birds captured of this scarce migrant from the north, probably Scandinavia. |
| Greenfinch | Showing signs of recovery from the bug that has decimated the local population. |
| Goldfinch | An abundant, regular visitors to the feeder. |
| Siskin | Good numbers visited the feeder in the first winter period; Jan to Apr. |
| Linnet | Difficult to capture and not yet visiting feeders. |
| Mealy Redpoll | A recent split from the next species which it was formerly co-specific with ten individuals in the first winter period after not capturing any during the Newbury Ringing Group's 40+ years history. |
| Lesser Redpoll | Phenomenal numbers visited the feeder in the first winter period Jan to Apr almost double the group's total for the 1967 to 2011 period! |
| Bullfinch | A resident breeder particularly in the 616 scrub. |

Firecrest 30th Aug 2011

Brambling 16th Jan 2011

Below is a schedule showing the number of captures of each species, the number ringed (new) during 2011 and the number and year of ringing of recaptures

Initial Ringing Year Species Totals Report for**Greenham Common 2011**

| | Total Capture | New in 2011 | Recaptures | | | f r o m |
|--------------------------|--------------------------|------------------------|-------------------|-------------|-------------|----------------|
| | | | 2010 | 2009 | 2008 | 2007 |
| Sparrowhawk | 1 | 1 | | | | |
| Kestrel | 1 | 1 | | | | |
| Ringed Plover | 7 | 7 | | | | |
| Lapwing | 21 | 21 | | | | |
| Collared Dove | 2 | 2 | | | | |

| Bullfinch | 10 | 10 | | | | |
| Reed Bunting | 1 | 1 | | | | |

List of Species showing ringing totals for the sub-sites on Greenham Common**(Codes as for visit schedule)**

Most captures are at the winter feeder (FDR616) as might be expected, followed by the scrub to the east of the Fire Plane Gravel (FPGE)

The scrub at FDR616 is ringed throughout the year particularly during Spring and Autumn migration and from October to March of the following year.

| Species | 616E | 616W | LOZ | CPO | FDR616 | FPG | FPGE | FPGW | WOS | PHILL | SAN |

Nest Recording

In 2011 a nest monitoring group was set up, although initially there were eight volunteers it stabilised at five members. Pulli in nest boxes at Peckmore and Sandelford Copses are not normally ringed. 77 Nest were monitored with 65 Nest records submitted to the National Nest Record Scheme

The Peckmore Team (Steve Coulson, Martin Dear, Jon Brockbank) in 2011: located, refurbished or replaced 17 old boxes in Peckmore Copse.

In the 2011 breeding season:

- Blue Tit occupied 5 boxes, 37 young fledged
- Great Tit occupied 4 boxes, 31 young fledged.

The Sandelford Team (Steve Ord, Katty Baird) in 2011 located, refurbished or replaced 17 old boxes in Sandelford Copse.

In the 2011 breeding season:

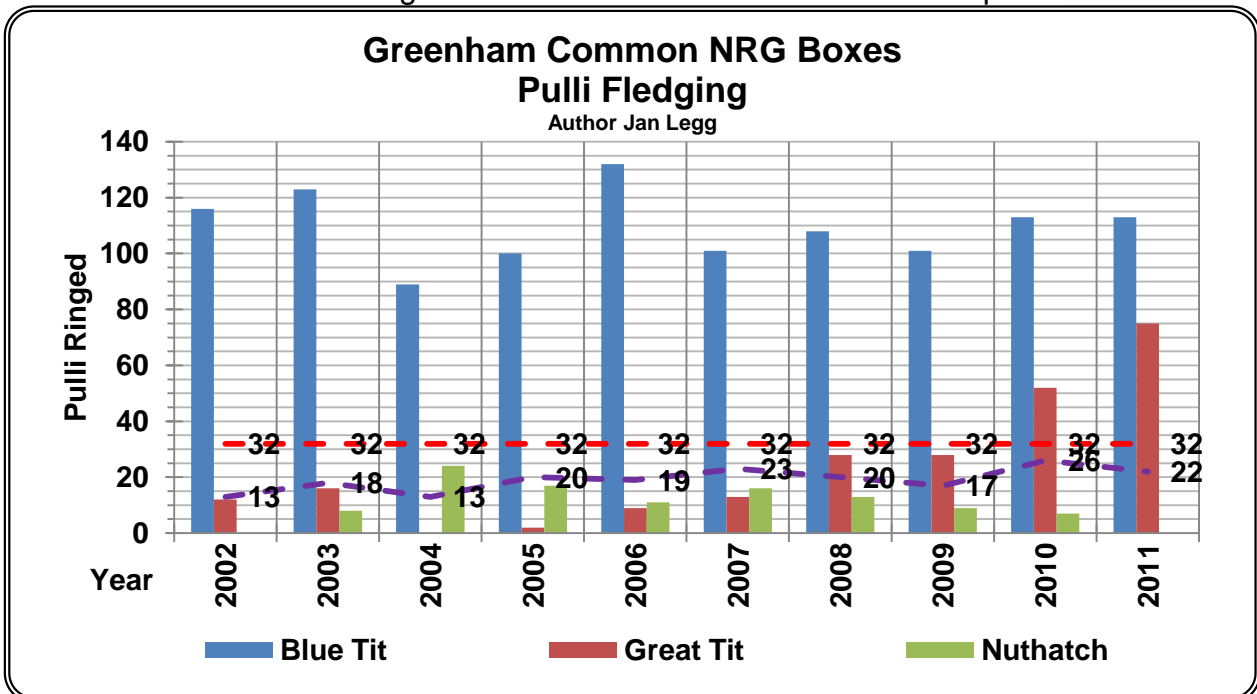

- Blue Tit occupied 7 boxes, 67 young fledged
- Coal Tit occupied 1 box 8 young fledged.
- Nuthatch occupied 1 box 8 young fledged

Newbury Ringing Group since 2002 monitored 32 boxes in the Balshill Gully/Aldernbridge Gully Woodland. (Peaked Hill)

In the 2011 breeding season:

- Blue Tit occupied 14 boxes, 113 young fledged
- Great Tit occupied 8 boxes, 75 young fledged.

Below is a chart showing species occupation and young fledge between 2002 and 2011. 2011 is a relatively good year. Blue Tit Numbers are fairly stable throughout the period and Great Tit numbers show a significant increase towards the end of the period.

Other species nest monitored on the commons in 2011

- Lapwing 16 nests monitored, 5 young fledged
- Ringed Plover 4 nests monitored, 5 young fledged.
- Little Ringed Plover 4 nests monitored, 1 young fledged
- Meadow Pipit 1 nest monitored, 4 young fledged.
- Woodlark 2 nest monitored, 3 and 2 young fledged.

Ringing Totals for the period 2002 to 2011

| SPECIES | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | Total |
|----------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|--------------|
